Preface

This biannual survey on hours of actually worked and average earnings had been initiated in 1972 by the Department of Labour in pursuance of the ILO convention No. 63. However, the survey had discontinued in the middle of 1980's due to some reasons. The survey has been restarted in 2008 and the months "March" and "September" were concerned as reference period to the survey from year 2008 and onwards.

This report is the eighth of the new survey series on Hours of Actually Worked & Average Earnings of employees covered by 44 wages boards, which were established under the wages board ordinance in Sri Lanka.

The present demand of investors, researchers, planners, policy makers and members of the wages boards for wages statistics have requested the need for such a report. The main objective of this survey is to provide information, which can be used in collective bargaining, minimum wages determination and development policy formulation and monitoring.

This publication has been organized and prepared by the Statistics Division of the Department of Labour under the direction and guidance of Mr. K.W.S. Saddhananda, Deputy Director Statistics.

The Department of Labour acknowledges the cooperation received from the numerous enterprise, organizations, employers and other agencies in providing the required information.

1. INTRODUCTION

1.1 SURVEY BACKGROUND

This is the eighth annual report in the reoriginated new series, which is published in The Survey on Hours of Actually Worked & Average Earnings - 2015.

This series of reports have been continuously published by the Statistics Division of Department of Labour since 1972, with the data collected from annual sample surveys. The sample of establishments was selected from the Annual Employment Survey respond list of the preceding year. The survey was conducted biannually at the beginning and it had been continued until 1975. The information on man-hours, earnings and related matters such as number of days worked, shift worked, occupational distribution of employees, systems of payments and pay period have been collected by this survey. However, the survey had been conducted once a year with reference month as June from 1975 and the questionnaire was modified to collect information on employment, man days and hours worked, leaves and salaries under 8 broad occupational categories. Although the survey was inactive later, it has been restarted in 2008 and continued until 2013 biannually.

The survey has been conducted twice a year, with the reference period of whole months March and September respectively from 2008 and the report was published annually. The Survey on Hours of Actually Worked & Average Earnings was reorganized in the year 2014 to represent each wages boards with additional information. The main purpose of the survey is to compare the average earnings and hours of work of employees covered by the Wages Board Ordinance with information of Earnings, Hours of Work, and all the Occupations covered by 44 Wages Boards. The information, which was collected by this survey, provides to the Year Book of Labour Statistics and the Annual Labour Statistics in Sri Lanka. Moreover, the information collected from the survey could be used to assess the minimum wages, which were determined by the wages boards of the Department of Labour.

The new set of questionnaires was introduced with some improvements under the reorganize project in 2014, including the basic salaries of workers and earnings of other staffs (staff grade / non staff grade), who were not belongs to the relevant wages boards.

This survey covers the 44 Wages Boards as follows according to the International Standard Industry Classification

1.2 ILO DEFINITIONS

1.2.1 The Hours of Work

The hours of work relate to any period of time spent by persons in the performance of activities, which contribute to the production of goods and services within the general production boundary as defined by the United Nations System of National Accounts.

Hours of actually worked per employed is a mathematical concept, derived by dividing the number of all man hours worked in a year by the annual average of employed persons. This is obtained the average annual hours actually worked per employed. Hours actually worked can also be calculated for each employee.

The various types of statistics on hours of work presented as follows,

- Hours actually worked
- Hours paid for
- Hours usually worked
- Normal hours of work

1.2.2 Hours of Actually Worked

The concept of hours actually worked relates to the time that persons in employment spend on work activities during a specified reference period, comprising:

- (a) Time spent directly on production (producing goods and services, including paid and unpaid overtime);
- (b) Time spent to facilitate production, necessary to work activities or to enhance the performance of persons (design, prepare, maintain the workplace, procedures, tools, including receipts, time sheets, reports), changing time (donning necessary work clothing), transporting activities (door to door, bringing agricultural produce to market) and work-related training;
- (c) Time spent in-between main activities (awaiting customers, stand-by for reasons such as lack of supply of work or power, machinery breakdown, accident), travel time to meetings or work assignments, active on call duty (as for health and technical service professional);
- (d) Resting time (short rest or refreshment breaks including tea, coffee or prayer breaks).

Hours of actually worked excludes time not worked, whether paid or unpaid, such as:

- (a) Annual leave, public holidays, sick leave, parental leave, etc.;
- (b) Meal breaks;
- (c) Time spent on travel from home to work and vice versa, also known as commuter travel, that is not actually time spent working.

Hours of actually worked covers all types of workers, whether in self-employment jobs or in paid employment jobs; it may be paid or unpaid and carried out in any location, including the street, field, home, etc.

1.2.3 Hours Paid For

The hours paid for concept covers workers in paid employment and comprises all hours, whether worked or not, that have been paid by the employer. When compared to the hours actually worked of employees, it covers all paid hours, even those not worked, such as paid annual vacation, public holidays, paid sick leaves, other paid leaves, and excludes all unpaid time worked (for example, unpaid overtime).

1.2.4 Hours Usually Worked

The hours usually worked relates to the hours actually most commonly worked per week by persons in paid and self-employment during a long reference period such as a month, season, or other long period, i.e., the typical value of the weekly hours worked. As compared to the normal hours of work, all usual overtime is included in hours usually worked. All time worked not on a usual basis is therefore excluded.

1.2.5 Normal Hours of Work

The concept of normal hours of work covers a subset of persons in paid employment (e.g. those covered by labour laws and regulations) and relates to the hours in a day, week or year that they are expected to be at the disposal of their employer according to legislation, collective agreements or arbitral awards. When compared to the hours actually worked of employees, normal hours of work exclude all overtime (paid and unpaid) but includes all time, which is paid at normal rates even if not worked.

1.2.6 Hours Actually Worked Per Employee

Hours actually worked per employed are a mathematical concept, derived by dividing the number of all hours worked in a year by the annual average of employed persons. Thus is obtained the average

annual hours actually worked per employed. Hours actually worked can also be calculated separately for employees.

1.2.7 Averaging Methods

For statistics derived from establishment surveys, average hours actually worked or average hours paid per person or per day or per week or per month are normally compiled by dividing the total number of hours actually worked or paid for during a week or a month by the average number of workers on the payrolls during the same period. Average hours actually worked or paid per day are generally compiled by dividing the total number of hours actually worked or paid for during a week, fortnight or month by the total number of days actually worked or paid for during the same period.

The following statistics were calculated from this survey.

Average Number of Working Days Per Person

This compiled by dividing the total number of man days worked during the month by the number of workers in the payroll during that month.

Average Number of Hours Work Per Day

This calculated by dividing the total number of man hours worked including overtime hours during the month by total number of man days worked during that month.

Average Number of Hours Work Per Person Per Month

This calculated by dividing the total number of man hours worked during the month including overtime hours by number of workers in the payroll during that month.

Average Earnings Per Person Per Day (In Rs.)

This calculated by dividing total wages earned including allowances, overtime payments etc. during the month by total number of man days worked during the month.

Average Earnings Per Person Per Month (In Rs.)

This calculated by dividing the total earnings of workers including allowances, overtime payment etc. during the month by the number of workers on the payroll during that month.

Average Basic Earnings Per Month (In Rs.)

This calculated by dividing total basic wages earned excluding allowances, overtime payments etc during the month by the number of workers on the payroll during that month.

1.3 MINIMUM WAGES

The minimum wages of each Wages Boards are given in Appendix.

Skilled Workers :

Skilled workers of civil engineering field have worked 23 to 25 days per month and their working duration per day was around 8.5 hours. The average earnings per day of males were higher than female workers in this field. Though, the female workers have received a higher average monthly total salary (Rs. 36,993.00) than the male workers (Rs. 28,108.17), the basic salary of male workers (Rs. 22,360.56) was higher than the female workers (Rs. 15,280.00) in this engineering field.

No response of female workers in other engineering fields for both skilled and semi-skilled categories.

Semi-Skilled Workers :

A significant difference of working pattern can be seen among semi-skilled workers with skilled workers. However, the monthly total earnings of semi-skilled workers were higher than the earnings of skilled workers in Civil Engineering field. The average total salary of male civil engineering workers (Rs. 47,682.95) was also higher than the male mechanical engineering workers (Rs. 23,880.18), and the similar pattern was found for their basic salaries too.

Unskilled Laboures :

The male workers were only found in this Category and their average total and basic salaries were approximately same as Rs.20,000.00.

Watcher :

The male watchers got high average daily payment (Rs. 652.78) and total monthly payment (Rs. 16,875.00). Their average basic salary was Rs. 14,375.00. The watchers worked averagely 9.31 hours per day and 21.50 days in a month.

Trade Learners and Apprentices :

The male Trade Learners and Apprentices received Rs. 9,062.82 as average total monthly payment.

The working pattern of workers in Grade I employment category was approximately same for both sexes and they have worked same duration around 8 hours per day and 25 days in a month. The male workers got very high total salary (Rs. 22,288.03) than females in this grade and both workers obtained close average basic monthly salary.

The male workers and female workers in Grade II have same working hours (about 9) in a day and both of them have worked around 24 days for a month. Their average basic salary was in the range from Rs. 12,000.00 to 14,500.00 and average total salary of them has varied between Rs. 14,500 and Rs. 18,500.

The Grade III workers have worked 8.5 hours per day and nearly 24 days per month averagely, and their average daily wages were Rs. 517.50 and Rs. 391.05 for males and females respectively.

Although the average working days of female Kanganies were higher than males in Desiccated Coconut Manufacturing field, the number of working hours per day was slightly higher for males. Further, male workers have earned higher amount (Rs. 1,043.36) than twice of the average daily wages of the female workers (Rs. 503.62). Similarly, the total monthly earnings of male Kanganies (Rs. 31,363.09) were higher than female Kanganies (Rs. 20,520.63).

The male and female employees have same working pattern and the daily payment of female workers was slightly higher than the male workers in the Manufacture of Coconut Oil. Furthermore, the male and female workers have received the same total and basic salaries.

Biscuit Manufacturing Trade :

The male and female workers have the close work duration (average working hours in a day and working days in a month) in each grades of the Biscuit Manufacturing Trade except Class B. The daily earnings and monthly basic salaries of male workers were also slightly higher than the earnings of female workers of each grades in this Trade.

But the average monthly total salary of male workers (Rs. 25,521.48) was higher than that of female workers (Rs. 18,222.93) in the Class A Biscuit Manufacturing. It was also found that the significant difference of the total salaries can be seen among the male and female workers in Class B.

Unskilled workers have earned comparatively lower daily wages than skilled and semi-skilled grades. The same trend was found in average basic salary.

Confectionery Manufacturing Trade :

The workers of Confectionery Manufacturing Trade have earned more than the Biscuit Manufacturing Trade workers in each grade.

The male workers worked slightly higher number of hours per month than the female workers in all Classes in this trade and all workers have worked more than 11 hours per day and 24.5 days in a month except the Class C female workers in this trade.

The daily earnings of male workers were higher than female workers in each Grades. Thus, male workers got the higher basic salaries than female workers and both workers have received more than Rs. 12,000.00 as average basic salary in each grade except the Class C female workers in this trade.
